

An Analysis of Fall 2018 and Spring 2019 Indiana State University Bachelor Degree Recipients

Who are the Recently Degreed Students?

The majority of graduates were women, white, Indiana residents, and/or first-time freshmen. Most graduates attended one or more summer sessions.

The average GPA for the 1,574 most recent degree recipients was 3.3, regardless of entry as a first-time freshmen or a transfer or readmitted student.

Most graduates who entered as first-time freshmen started ISU with college credits and/or changed their major at least once.

Factors Correlated with Time-to-Degree

Note that even though some take longer to obtain their degree, these are successful students!

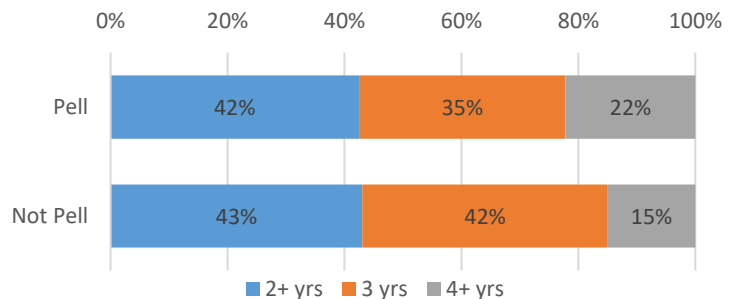

Overall, it took graduates who started as first-time freshmen 4.2 yrs and transfer or readmitted 3.0 yrs to obtain their degree.

It took longer for recipients to obtain their degree if they were African-American, Pell recipients, changed their major, or on probation at least once.

Gender differences occurred for graduates starting as first-time freshmen, with men (4.3 yrs) taking longer than women (4.1 yrs), but those who transferred or readmitted did not show gender differences.

On time graduation was more likely for those who started as first-time freshmen with college credits and/or ten or more College Challenge hours.
