

Indiana State University

2004 - 2005 Administrative Annual Report

Student Health Center

Year in Review

Achievements

As you have heard, increasing public awareness of Indiana State University's accomplishments is crucial to building student enrollment, influencing policy makers, and developing a place of pre-eminence in the Midwest. What do you consider to be your department's accomplishments for the 2006-07 year that will contribute to this effort? (Please list in priority order and limit to no more than 8.)

1 and 2. The upgrading of nursing salaries allowed us to recruit some very skilled individuals who had experience in Emergency Room Nursing, Outpatient Nursing and Recovery Room Nursing. This has benefited students by being able to provide more services in the Student Health Center rather than having to refer students to other facilities which are quite expensive. Examples would include allergy injections, monitoring of individuals for several hours in order to perform testing and make a more informed diagnosis, lab diagnosis of Flu on site in just a few minutes, reading EKG's etc. 3. Immunization compliance was maintained by the attention of a Registered Nurse who spends much of her time on immunizations during the 12 month school year. 4. At present we are above the numbers of visits over last year. This is partly due to the increase in staff and the addition of two more exam room. 5. The Student Health Insurance program went smoothly last year but we are hoping to recruit more students to that program next year.

Action Steps

In light of the new [strategic direction](#) of the University can you modify your action steps or develop new action steps that will aid in the implementation of the University's Strategic Indicators?
